

DR. MICHAEL CLAGUE

Dr. Clague was born and raised in Ohio, and in 1977, following completion of Medical School, relocated to the Tidewater region to serve as a U.S. Navy Medical Officer. He and his wife, Barbara, settled in Gloucester in 1991 when Dr. Clague joined the medical staff of Riverside Walter Reed Hospital as the Medical Director of Radiology and serving as a Radiation Safety Officer. In his tenure with Riverside, Dr. Clague also served terms as the Medical Staff President and Executive Committee Chairman. Since his retirement he has been looking forward to opportunities to “give back” to the community and is excited to serve the Gloucester-Mathews Humane Society as a Board Member.
